*UP TO 30LB ROOF LOAD*

## PERGOLAS & PAVILIONS

# Instructions & Helpful Tips

The Temo Inc Price Guide is a complete guideline to enable you to quote nearly any project that you are seeking to complete. If your job site is larger, taller or a unique design, you may want to review this with a Temo Representative or Engineering. If the project goes beyond the book in any way, we would recommend that you seek to obtain an Architectural Drawing Fee from the homeowner to allow you to present an accurate quote for a presentation. There may be a small fee for extensive drawing projects.

**TO ACTIVATE THE WARRANTY** – The homeowner must fill out the tear-off portion on the warranty certificate and mail to Temo Inc. You can also register online at: [www.TemoInc.com/warranty](http://www.TemoInc.com/warranty)

## THERMAL ROOF LOAD SPAN CHART

All spans are the outside wall.

DESCRIPTION	LOAD / SPAN	PRICE
.024 1# - Roof Panel	10 lb - 18' - 0"	\$21 PER SQ FT
	20 lb - 13' - 0"	
	30 lb - 10' - 6"	
	40 lb - 9' - 0"	
.032 1# - Roof Panel	10 lb - 19' - 0"	\$24 PER SQ FT
	20 lb - 15' - 0"	
	30 lb - 12' - 0"	
	40 lb - 10' - 6"	
.032 2# - Roof Panel	10 lb - 20' - 0"	\$36 PER SQ FT
	20 lb - 18' - 3"	
	30 lb - 15' - 6"	
	40 lb - 13' - 1"	
	50 lb - 12' - 0"	
	60 lb - 11' - 0"	
	70 lb - 10' - 0"	
	80 lb - 9' - 6"	
	90 lb - 8' - 0"	
	100 lb - 7' - 6"	

**NOTE:** All roof panels are in 4' increments.  
This price guide is based on a 30-pound load.  
To estimate the cost for a 10 & 20 pound load:

1. Calculate the square footage of the roof.
2. Refer to the "Thermal Load Span Chart" to find the price difference per square foot between the 30-pound and 10-pound loads.
3. Multiply the price difference by the total square footage and subtract this amount from the published price.

### EXAMPLE:

For a 13' roof panel (12' projection) x 20' width = 260 sq ft:

- Price difference: \$3 per sq ft
- Total deduction: \$3 x 260 sq ft = \$780

**You can estimate a \$780 deduction from the published price.**

### SPANS GREATER THAN 24'

Require Splice Plate Plus Engineering

\*MID-SPAN BEAM MAY BE REQUIRED ON LOADS ABOVE 30LB WITH LARGER PROJECTION SPANS - SEE PAGES 4-6

## DISCLAIMER:

You cannot just remove one Skyview from the design because it breaks up the engineering symmetry of the roof. It represents 2' and a roof panel is 4', if you choose to do this, one of the roof panels will have two feet extra and the symmetry will be off. It would be a field cut situation and this decision would fall onto the installer to do it right. Blue LED Lights are standard on Skyview Skylights, no other colors are available. LED Transformer to convert to 12Volt is needed to be purchased locally. Wires are included to hook up the LED Lights to a power supply and an ON/OFF switch may also be needed to control the lights.
